New Gusher Capabilities

The New High Speed Machining Center is running in Dry Ridge....

Gusher Dry Ridge is now up and running with the new Ibarma multi-process milling system. This machine is capable of completing multiple functions in a single operation, including latheing, milling, turning, drilling and tapping of extended columns (up to 10 feet), impeller housings and bearing housings.

A perfectly milled column, in half the time with the Ibarma system...

Recent Great Southern Projects...

City of Sanford, FLA ...10" x 8" Split Case Pumps with 125HP TEFC motors and bases manufactured by Great Southern Pump. These are part of a Water Treatment Plant expansion which also includes 6 Vertical Turbine Pumps and a custom control panel. manufactured by Primex Controls.

Loaded and ready for delivery to a new customer in Louisiana, is a Deming Mixed Flow Pump with a 18" fabricated discharge head rated for 9000 GPM at 40' TDH.

Imperial Lakes High Service Pump Installation.

Florida Water Resources Conference

Ruthman Companies Well Represented

The 2014 FWRC recently held on April 6-9 at Disney Coronado Springs Resort and Convention Center was a huge success. Over 300 exhibitors and 2300 attendees participated this year, including a great showing by Gusher, Nagle, Process Systems and Great Southern Pump. The premier joint utility conference, this is Florida's marketplace for the water, wastewater and stormwater industry. This annual event draws the industry's top level executives and decisions makers in one place.

GSP Facility Opens for Time Tested Brands...

Expansion of Expert Service and Distribution of the Top Product Names..

The new Great Southern Pump facility is now open. The 10,000 square foot building will serve as the Florida municipal and Industrial market's one-stop source for Deming, Gusher and Nagle products, as well as an expert repair center for all makes of municipal and industrial pumps. The center is easily accessible off I-95 in Titusville Florida.

Process Systems Hosts Pump Seminar

A Productive and Educational Day at the PSI Facility

On May 1, Process Systems, in conjunction with Great Lakes Pump presented a seminar on pump basics for some clients, including representatives from Chrysler Powertrain, Henry Filter, Quaker Chemical, Zealtek and Exactraction at their Warren, Michigan location. Topics included Pump sizing and configuration basics, pump performance curves and NPSHr and NPSHa factors in pump design. With a shop tour, vertical turbine parts were reviewed and the pump assembly assembly table (PSI Turbine Changer) was observed. PSI pump cut-aways were shown followed by presentation on heat exchangers and a Q&A session. A productive day for all!

Towering Turbines

Recent installation in Ohio

Ed Adams of Great Lakes Pump & Supply Co. shares these photos of an installation of PSI Turbines with a filter company for a Ford transmission plant in Sharonville Ohio.

Ruthmann Pumpen Installation

Christoph sends these photos from an large installation for a German auto supplier. The products included eight 7550 vertical pumps and 24 horizontal closed coupled ZS models.

Supporting Our Eyes to the Skies...

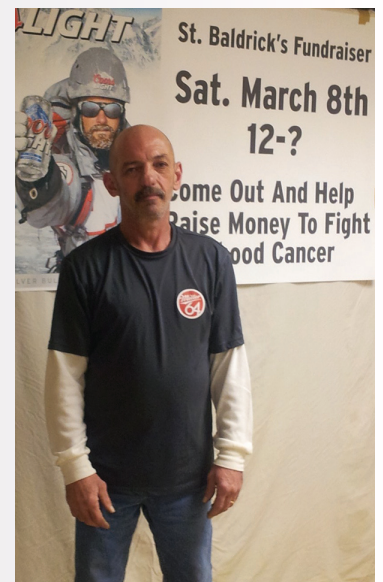

Pictures of a recent application of Fulflo valves for NASA which are being used on their 70-meter antennas, part of the deep space network located in three locations around the earth. There are two hydraulics systems driving the large antenna. A 4" Fulflo valve is used in the hydrostatic bearing assembly which basically supports the weight of the 8 million pound antenna. The smaller 3" valve is used as part of the servo hydraulics systems that drives the antenna in elevation and azimuth.

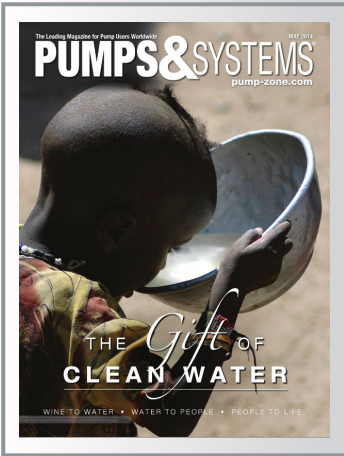

Nagle Employee Gives Back...

Hair Raising?

Bruce Garrett, Nagle's shipping and receiving man raises money each year for St. Baldrick's day which is a yearly fundraiser for kids with cancer. Here are some photos before, during and after. His local group has raised over \$8,000 this year for this worthy cause!
