REPORTER

OCTOBER 2013

THE SOURCE FOR RUTHMAN COMPANIES EVENTS AND INFORMATION

HAPPY HALLOWEEN

FROM THE GREAT

GUSHER PUMPKIN!

Showtime for the Big 3 in Chicago...

Gusher, Nagle and Great Southern, featuring Deming Turbines, had a productive showing at this year's WEFTEC show in Chicago. A record number of 22,589 registrants and 971 companies using 297,400 net square feet of exhibit space has designated WEFTEC 2013—the Water Environment Federation's (WEF's) 86th Annual Technical Exhibition and Conference—as the largest in the show's history.

Fulflo on the Move...

Fulflo recently exhibited at The 42nd Turbomachinery and 29th International Pump Users Symposia (Pump & Turbo 2013), held at the George R. Brown Convention Center in Houston, Texas on September 30 - October 3, 2013. Exhibitors reached 5,857 people, a number that is up almost 400 from 2012 and which set a new record for attendance, including a record-number of international attendees.

Canadian Certification...

Fulflo does it again! Fulflo is proud to announce receipt of the Certificate of Achievement and receipt of the Canadian Registration Number (CRN) from the TSSA for Quebec, Saskatchewan and Alberta. Fulflo's strict quality control system is recognized again it and allows Fulflo to distribute products in Canada.

Pumps & Systems Features Fulflo...

The staff of Pumps & Systems magazine recently visited the Fulflo plant, taking photos and videos for an upcoming feature. Look for the article in this coming April's print and web issues.

Made in USA...For Germany

Recent Shipment meets Highest Standards...

Gusher recently built and shipped 45 of these DIN specification pumps for use in a Mercedes plant in Germany. This International project is a great example of the merging of American design with rigid European standards, utilizing USA made Nema motors and couplings and seals.

More Gusher Innovation...

Installation makes dollars (and sense) at YKK Fasteners...

These two 6 foot long vortex cantilever pumps with 54 power frames and 3.750 OD shafts have a secondary mounting plate to match the waste water tank. These pumps took the place of 12 air diaphragm pumps that had to be cleaned and repaired every 1-2 months. This arrangement not only keeps the repair cost down but also reduces the air consumption down for all around cost savings!

Bill Hein Presents...

We are proud to note that Bill Hein of Ruthman Company's Nagle Pumps has been asked to host a seminar next month in Dubai...

Free Nagle Product Seminar
Hydro Middle East - Dubai, UAE
Wednesday, November 6, 2013, 1:30 p.m. - 4:00 p.m.

You are invited to join us on Wednesday, November 6, 2013 at [Hydro's Middle East Service Center](#) in Dubai, UAE for a technical seminar presented by Bill Hein of Nagle Pumps. This seminar is designed for anyone responsible for the selection, operation or maintenance of pumping systems for abrasive or corrosive applications. Topics covered in this seminar include:

- Design Principles for:
 - Submerged Bearing Pumps
 - Horizontal Pumps
 - Submersible Pumps
 - Vertical Cantilever, wet and dry mounted pumps
- How to extend pump life and reduce maintenance costs
- How to minimize seal maintenance
- How to increase bearing life
- Pumping System Designs and Construction features that can lower labor costs

Hydro's New Service Centre
Ph: 971 (4) 8875375

Please RSVP by October 23, 2013
to Suzanne Thorne at
sthorne@hydroinc.com
