

Our Promise

Engineering Pump Solutions

Family owned and operated for three generations, the Ruthman Companies' brands have built their reputations on solving pump and process problems. With millions of pumps installed world-wide, each of our brands has the experience needed to meet tough application challenges. Our divisions custom manufacture a wide range of pump and valve types to exacting specifications, assist with installation, and provide service for the life of the product.

Co-founded by brothers Alois and Edward Ruthman, Ruthman Companies began in the year 1912 as the "Ruthman Machinery Company." Based in Cincinnati, the company serviced the steam-boats that traveled the Ohio River.

In 1924, Alois conceived the first sealless centrifugal pump, coining the term 'coolant pump' to describe it. The brothers gave this new pump the name "Gusher," giving birth to what is now Ruthman Companies' flagship brand, Gusher Pumps.

With each generation, the company has grown its brands and product offerings. Today, Ruthman Companies encompasses seven manufacturing divisions. Each has developed a reputation of unmatched industry experience, top quality and service.

Ruthman Companies values its history as a family company—not only in its ownership, but also among its divisions, where there are often multiple generations working together.

Our Manufacturing Divisions

Gusher Pumps - Williamstown, KY

Gusher Pumps engineers and manufactures centrifugal pumps for industrial and municipal applications at its Kentucky plants. Our Indiana sales and service location, plus a vast network of trusted distributors provide localized support. In China, Gusher Shanghai serves as a sales and distribution center for Gusher's growing customer base across Asia.

In addition to a range of stock pumps, Gusher has years of engineering expertise to customize its pumps to even the most challenging applications. Vertical and horizontal pump models include:

Close-Coupled, Self-Priming, Multi-Stage, End-Suction, Block DIN and ANSI Spec Pumps, Vortex, Cantilever, Immersible, Sludge, Screw

Phone: 859.824.3011 | Email: Info@Gusher.com | www.Gusher.com

BSM Pump Corporation - East Providence, RI

BSM manufactures a broad selection of gear pumps for fluid transfer, lubrication, hydraulic, and coolant applications. Industrial and OEM pumps are manufactured in the USA to strict quality standards. Stock and custom-engineered models include:

Positive Displacement Rotary Gear Pumps, Automatic Reversing Vane Pumps, Stainless Steel Pumps, Lubrication, Coolant, Hydraulic Assemblies

Fulflo Hydraulic Valves - *Blanchester, OH*

Fulflo hydraulic by-pass relief valves are relied on for pump and systems protection in a wide range industrial and military applications. To ensure reliable, chatter-free operation in the most demanding environments, all metal parts are manufactured, machined, stamped and assembled in the USA. Valve types include:

Pressure Safety Valves, Safety Relief Valves, Pressure Relief Valves, Conventional Safety Relief Valves

Phone: 937.783.2411 | Email: Info@Fulflo.com | www.Fulflo.com

Nagle Pumps - *Chicago Heights, IL*

Nagle Pumps custom engineers each pump to meet rigorous requirements, offering a wide selection of designs, components and materials. Its heavy-duty pumps are manufactured to withstand abrasive, corrosive and high temperature applications. Products include:

Vertical Cantilever Wet Pit Pumps, Dry Mounted Cantilever Pumps, Vertical Cantilever Shaft Pumps, Vertical Submersible Slurry Pumps, Vertical Submerged Bearing Pumps, Heavy Duty Horizontal Pumps

Phone: 708.754.2940 | Sales@NaglePumps.com | www.NaglePumps.com

Process Systems Inc. - *Warren, MI*

PSI manufactures Process Systems Vertical Turbines for industrial applications and is the exclusive manufacturer of Deming® Vertical Turbine Pumps for municipal and mining use. These durable and reliable pumps have evolved over the years to meet a range of customer needs and have proven themselves in the field over decades of use. Products include:

Deming® Vertical Turbine Pumps, VP-Magnum® Vertical Process Cantilever Pumps, Process Systems Vertical Turbine Pumps, Process Systems High Pressure Packages, Protect-A Pump Screen Systems

Phone: 586.757.5711 | Email: Sales@PSI4Pumps.com | www.PSI4Pumps.com

RAE Pumps - *Cincinnati, OH*

Launched in 2020 to serve the modern marketplace, RAE provides reliable, competitively-priced pumps. Large stock on-hand and online shopping offer the convenience of ordering direct or working with a preferred distributor. Models include:

Sealless Vertical Immersion Pumps, Close-Coupled Vertical Pumps, Close-Coupled Horizontal Pumps, Multistage Vertical Immersion Pumps, Multistage Vertical External Mount Pumps, Multistage Horizontal External Mount Pumps

Phone: 513.779.3034 | Email: Info@RAEPumps.com | www.RAEPumps.com

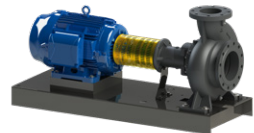

Ruthmann Pumpen, LLC - *Baesweiler, Germany*

Ruthmann Pumpen manufactures and sells Gusher centrifugal pumps and distributes Nagle heavy-duty pumps. Based in Germany, it provides sales and service to Ruthman customers across central Europe. Models include:

Close-Coupled, Self-Priming, Multi-Stage, Block DIN and ANSI Pumps, End-Suction, Vortex, Cantilever, EV Vertical Pumps, Immersible, Sludge, Screw Pumps
